

## WRAP & SUPPLEMENTARY NETWORKS

To date, double-digit increases in healthcare expenditures are presenting greater challenges and pressures on payors to reduce their plan's overall claims cost. INETICO has innovated two unique approaches to maximize claims savings that fall out of the traditional PPO network — Wrap Network Stabilization and Supplemental Clearinghouse programs.

### INETICO SERVICES

#### PPO ADMINISTRATION

Primary Network Administration

#### WRAP & SUPPLEMENTARY NETWORKS

Negotiation & Pre-Notification

#### ELECTRONIC CLAIMS MANAGEMENT

Claims Scanning

Archiving

Electronic Communication

### INETICARE SERVICES

#### CARE MANAGEMENT

Utilization Management

Case Management

Disease Management

Maternity Management

Clinical Claims Data Mining

## WRAP NETWORK STABILIZATION

INETICO's Wrap Network Stabilization program captures the majority of non-par claims and features expanded provider access beyond the primary network allowing discounts similar to primary network agreements. If you are not using the PPO Network Centrifuge (INETICO's solution to primary network gap management), your plan will benefit from Wrap Network Stabilization. INETICO has partnered with many of the strongest national and regional PPO networks to provide payors with the highest level of access and discounts for claims outside of the primary network. These networks require logo identification on the member's ID card which provides clearly identified access to the payor, patient and provider.

## SUPPLEMENTAL CLEARINGHOUSE

INETICO's Supplemental Clearinghouse minimizes non-par claims loss with increased discounts that typically exceed U&C pricing. Utilizing these programs can result in the difference between expanded savings or continued healthcare plan increases. While the Supplemental Clearinghouse program does require EOB identification when payment is made, it does not require identification at the point of service nor financial steerage.

## WHY WRAP STABILIZATION AND/OR SUPPLEMENTAL CLEARINGHOUSE

INETICO reviews each network relationship to determine which wrap and supplemental networks have the best discounts in a given area. INETICO then passes the discounts on to you. INETICO also protects you by managing disputes with providers and eliminating networks with agreements that are not clearly defined. This is why INETICO has a 99% dispute free process within our wrap/supplemental network programs and a 100% dispute success rate for negotiated claims.

## BENEFITS TO WRAP STABILIZATION AND SUPPLEMENTAL CLEARINGHOUSE:

- Powerful extended coverage beyond the primary network
- Superior primary network-like discounts (many Per Diem and Case Rates)
- Strong network solution to out-of-network claims
- Above average discounts of 25% to 35% for out-of-network claims (market dependent)
- Deep and stable provider discounts
- Expanded access to discounted provider services
